| Waves display               | Maximum 6 waveforms can be displayed on the same screen                                     |                                                                                                                                       |
|                             | Cardiotocography                                                                            | Max. 3 Fetal Heart Rate waves, Max. 2 Fetal movement waves, and 1 TOCO (UC) wave.                                                     |
| Alphanumeric display        | Cardiotocography (CTG)                                                                      | Fetal heart rate 1 (FHR 1) , Fetal heart rate 2 (FHR 2, option), Fetal heart rate 3 (FHR 3, option), TOCO (UC), Fetal movement counts |
| Window Switching            | Support Standby Mode, Night Mode, and Privacy Mode                                          |                                                                                                                                       |
| Snapshot                    | One-touch screenshot with zoom in/out; touch-screen supports swipe to browse saved screens. |                                                                                                                                       |

### Power supply

|              |             |
|--------------|-------------|
| Line Voltage | AC100~ 240V |
| Frequency    | 50 Hz/60 Hz |

### Battery

|                                 |                                               |
|---------------------------------|-----------------------------------------------|
| Type                            | Rechargeable lithium battery 14.8V            |
| Battery Capacity                | 2200 mAh                                      |
| Operating Time                  | 5 hours                                       |
| Recharge Time                   | 4.5 hours                                     |
| Charge Cycle                    | ≥500 times                                    |
| Optional large capacity battery | Rechargeable lithium battery (14.8v, 3350mAh) |
| Operating Time                  | 8 hours                                       |
| Recharge Time                   | 6.75 hours                                    |

### Printer (Built-in)

|                      |                                                          |
|----------------------|----------------------------------------------------------|
| Method               | Line Thermal printer (high-speed)                        |
| Paper                | Z-fold, thermosensitive                                  |
| Printer Resolution   | 8 dots/mm                                                |
| Printing Accuracy    | X-axis (time scale): ±5% ; Y-axis (amplitude scale): ±1% |
| Paper Specifications | Width: 112 mm (4.41 in), 112mm×100mm×150p                |
